
Return maps and reduced source-branch flow · $\kappa = 15$
A
SmoothF · return map
Next entry saliency Z^+
Entry saliency Z
$\kappa = 15$
Identity
B
Tanh · return map
Next entry saliency Z^+
Entry saliency Z
$\kappa = 15$
Identity
C
SmoothF · source-branch flow
Successor saliency $r = |z_{successor}|$
Source saliency $s = |z_{source}|$
D
Tanh · source-branch flow
Successor saliency $r = |z_{successor}|$
Source saliency $s = |z_{source}|$
Reduced saliency speed $\sqrt{s^2 + r^2}$
Orthogonal memories · unit gains · singular limit · paths stop at branch loss
Analytical reduced model · not a full-network phase portrait
Stable fixed point
Unstable fixed point
Stability boundary
Entry
Stability loss
Outside stable branch
